

**Physicians and Pharmacists: Please refer to this list when prescribing/dispensing medications.**

All strengths and formulations of the medications listed within this document are considered formulary unless specifically noted. Due to the constantly changing nature of drug therapy, the Formulary is a dynamic document and is subject to change without notice. The most up-to-date listing of the formulary can be found online at [www.rxsolutions.com](http://www.rxsolutions.com).

The brand-name is included for reference purpose; all medications listed in bold print are generically available. The cost index is based on the average cost per prescription or per 30 days supply and is denoted by one or more dollar signs:

\$	= \$0 - \$25
\$\$	= \$26 - \$75
\$\$\$	= \$76 - \$150
\$\$\$\$	= \$151 - \$300
>\$\$\$\$	= > \$300
